

## SUMMARY OF THE P@mELA PORTAL

P@mela is a French acronym for Partnership for continuous supplier improvement

«**P**artenariat pour L'**aMEL**ioration perm**An**ente des fournisseurs».

This application is designed to bring together our suppliers and the facilities of MARK IV AIR INTAKE AND COOLING. It is web-based and workflow-oriented for:

- speedily and comprehensively handling supplier quality incidents in the form of 8D
- communicating supplier performance
- tracking the performance of the manufacturing processes of suppliers as part of the PPQ5/BMW programme and the equivalent SPPF programme of MARK IV AIC
- documenting the qualification files on-line in the form of PPAPs
- evaluating quality and logistics of suppliers
- documenting supplier information
- providing the standards and requirements specific to MARK IV AIC
- tracking and documenting SIPP supplier improvement projects
- documenting and tracking supplier audits
- speedily and comprehensively handling supplier logistics incidents in the form of 8D
- communicating calls for tenders

The P@mela portal is a component of the Supplier Management System in MARK IV AIR INTAKE AND COOLING. The other components are:

- The system for the close tracking of risky suppliers  
SIPP "**S**upplier **I**mprovement **P**artnership **P**rogram"
- The new Supplier Quality Management organisation

### OBJECTIVES

- Efficient and fast processing of supplier alerts and incidents
- Common reduction of problem solving times
- Transparent and targeted exchange between suppliers and MARK IV AIC
- Improved quality of the exchanged data
- Transparency between the facilities of MARK IV AIC for suppliers and MARK IV AIC
- Standardisation of practices and documentation
- Improved quality of the purchased parts

### FIELD OF APPLICATION

The portal is applicable to all the suppliers of all the facilities of MARK IV AIR INTAKE AND COOLING.
